

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

Claim 1 (Currently Amended) A gas bag module for a vehicle occupant restraint system, said gas bag module (10) having including a gas generator carrier (14) and a covering cap (24), with said gas generator carrier (14) having a base (16) extending perpendicular to a central axis (A) of said gas bag module and with a peripheral wall (18) extending in an axial direction from an outer edge of said base (16), and also a covering cap (24) with said covering cap (24) having a side wall (30) extending in an axial direction from a front wall (26) of said covering cap (24), characterized in that detent hooks (32) are formed on an edge of said side wall (30) facing away from said front wall (26), which engage said detent hooks engaging into corresponding detent openings (34) in said base (16) of said gas generator carrier (14), thus forming a detent mechanism for connecting the covering cap (24) to the gas generator carrier (14).

Claim 2 (Currently Amended) The gas bag module according to claim 1, characterized in that wherein an external diameter of said side wall (30) corresponds to an internal diameter (18) of said peripheral wall (18) and said detent openings (34) in said base (16) adjoin said peripheral wall (18).

Claim 3 (Currently Amended) The gas bag module according to claim 2,  
~~characterized in that wherein~~ said detent hooks (32) point outwards and engage  
behind an underside of said peripheral wall (18) facing away from said front wall  
(26).

Claim 4 (Currently Amended) The gas bag module according to claim 1,  
~~characterized in that wherein~~ said detent hooks (32) can be elastically deformed in a  
radial direction.

Claim 5 (Currently Amended) The gas bag module according to claim 1,  
~~characterized in that wherein~~ spring elements (36) are formed onto said base (16),  
which hold said detent hooks (32) in position when said gas bag module (10) is  
installed.

Claim 6 (Currently Amended) The gas bag module according to claim 5,  
~~characterized in that wherein~~ said spring elements (36) can be elastically deformed  
in an installation direction of said covering cap (24).

Claim 7 (Currently Amended) The gas bag module according to claim 5,  
~~characterized in that wherein~~ said spring elements (36) provide for a radially  
outwardly directed prestress of said detent hooks (32).

Claim 8 (Currently Amended) The gas bag module according to claim 1,  
~~characterized in that~~ wherein the gas generator carrier (14) consists of plastic.

Claim 9 (New) The gas bag module according to claim 1, wherein detent  
hooks contact said peripheral wall (18).

Claim 10 (New) The gas bag module according to claim 9 including a gas bag  
(20), wherein said gas bag is not positioned between said side wall (30) and said  
peripheral wall (18).

Claim 11 (New) The gas bag module according to claim 1 wherein said detent  
hooks (32) are formed on the edge of said side wall (30) before said detent hooks  
(32) engage into said detent openings (34).

Claim 12 (New) The gas bag module according to claim 5, wherein said  
spring elements (36) yield to allow said detent hooks (32) to pass through said  
detent openings (34) when said gas bag module (10) is being installed.

Claim 13 (New) The gas bag module according to claim 1, wherein said  
covering cap (24) is connected to said gas generator carrier (14) only by a pair of  
said detent hooks (32).
